

## Just Add Furniture

Play with the layout of the furniture in your kitchen to see if you have room for a small comfortable chair. It will become a favorite spot of family or friends as they keep you company while you cook. It is also a wonderful place for you to relax while they clean up after dinner.

## A Few More Tricks

Find a pretty piece of pottery or glassware to hold your spatulas, whisks etc. That eight inch bowl that you fell in love with would make a great utensil holder. Do not let your favorite pieces hide in the cabinet - find ways to use them on the countertop. If you have too many favorites and do not want clutter, rotate them every month. It is an easy change that will keep your decor fresh. A small lamp tucked into a corner on the countertop will softly light the kitchen at night, shop for one that has an interesting shape or shade.

A favorite designer trick for adding color to the kitchen is to place tall thin floral arrangements on each side of the sink. Eighteen inch topiaries adorned with lemons or pears make perfect accent pieces.

Thank you for letting me share some of my ideas with you today. Remember to send me your favorite finds that you have turned into something special for your home. I love your creativity and I want to share it with other readers.
